# WEATHER CAMP

## *National Weather Camp at the University of Nebraska–Lincoln*

Weather Camp is a week-long residential camp for students who will be entering grades 9-12 in the fall.

During the week, campers use instruments to make weather observations. Field trips include visits to several agencies to see meteorologists in action.

Weather campers get to meet actual scientists and learn more about science careers.

*For dates and further details, visit:*

**A week full of weather, fun and learning.**

Our Weather Camp is part of a national network of weather camps. Most activities take place at Hardin Hall, on East Campus at the University of Nebraska–Lincoln, with several field trips.

**Organized by:**

College of Arts and Sciences | Nebraska 4-H  
Earth and Atmospheric Sciences Students
